GREEN WASTE & BULK WASTE COLLECTIONS

FOOD WASTE

Without meaning to, we're wasting twice as much food as we think – Australian households throw away the equivalent of **7.7 million meals** every day.

What is food waste?

Any food that ends up in the bin instead of being eaten is food waste. Some food waste (like bones and peels) isn't edible, but most food waste (70%) is actually edible, so the best place for it is on our plates, not in the bin.

Let's turn food waste around with The Great Unwaste.
