Foreshore Earthworks and Revegetation

30 April 2026

Dear Resident,

Sand Management and Revegetation Project – Claremont Foreshore

The Town of Claremont is pleased to announce the upcoming Foreshore Sand Management and Revegetation Project, scheduled for Monday 11th & 12th May 2026. We aim to complete the sand relocation works in one day, weather and contractor availability permitting. We have allowed for an additional day as a contingency.

Planting works will also be undertaken across May and June to enhance the foreshore environment, stabilise sand, and help prevent further erosion as part of the Claremont Foreshore Enhancement Plan.

Project Goals:

Replenish eroded areas: Relocate sand from the eastern side of Claremont Yacht Club to areas experiencing erosion near the Chester Road car park.

Enhance native vegetation: Plant local native species and sedge blocks along a section of foreshore East of Chester Road car park to create a healthy river environment, enhance habitat for foreshore wildlife, and stabilise sand to mitigate foreshore erosion.

Project Steps:

1. **Sand relocation:** Remove sand from where it accumulates at the western end of the foreshore near the Yacht Club and transport it to the Chester Road car park for stockpiling.
2. **Erosion control:** Spread the sand along the foreshore, covering exposed areas of rubble from Chester Road towards Mrs Herbert's Park.
3. **Finishing touches:** Top-dress and clean up the work area.
4. **Revegetation:** Infill eroded sedges along shoreline with sedge blocks. Remove some areas of turf and plant with low growing, native species.
5. **Installation of mulch and temporary fencing:** Inhibit weed growth and protect new plants from accidental trampling.

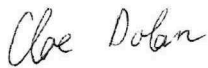

Project Schedule and Considerations:

- **Most work:** Weekdays, 7 am to 5 pm.
- **Chester Road turf area:** Temporary closures for sand storage and equipment access.
- **Public safety:** Please avoid areas with where vehicles and machines are operating.
- **Project updates:** Aerial images showing work locations are provided below.
- **Private Property Access:** Any existing boat access points into private properties will be maintained.

We understand this project may cause some inconvenience, and we'll strive to minimise any disruption.

For inquiries or further information, please contact the Town's Land Care Officer, Natalie Mitchell on 9285 4300.

Yours sincerely

Cloe Dolan
Manager Parks and Environment

Sand to be removed from East of Claremont Yacht Club.

Sand to be relocated to the East of Chester Road car park.
