GREEN WASTE & BULK WASTE COLLECTIONS

CIRCULAR ECONOMY

A linear economy depends on buying new, buying often, and throwing away last season's unwanted items – whether it's clothes, accessories, homewares, tech or toys – without really thinking about where they'll end up.

A circular economy is a system where materials and energy are kept circulating, at their highest possible value, for as long as possible, so **nothing goes to waste.**

LOOKING TO THE FUTURE

Becoming a **sustainable, low-waste, circular economy** is the vision of WA's waste strategy for 2030.

How to avoid creating waste

Choose loose fruit and veg • Remember your reusable coffee cup • Take a fabric bread bag to the bakery • Get to know your local bulk food store • Bring a reusable container for leftovers when you go out to dinner
