Dear Business Owner/Operator

Claremont Crescent: After Hours Closure for Western Power Works

To prepare for the replacement of Congdon Street Bridge, Western Power has scheduled the relocation of several transmission poles in early September 2024. To undertake this work safely, Western Power has advised that Claremont Crescent will be closed after hours, as illustrated below, with signed detours in place for motorists.

Tuesday 3 and Wednesday 4 September: Claremont Crescent closed to traffic between Franklin Street and Saladin Street, 7.30pm to 4am. During both overnight closures, the car parking within the blue shaded area shown below will be unavailable; however, parking will remain available at the rear of the shopping strip. The footpath on Claremont Crescent will also remain open during these road closures. Traffic controllers will be on site to provide assistance to all road users and pedestrians.

We would also encourage you to share this information with your staff, customers and communities.
